Work Experience

Software Engineer I: Verizon (Basking Ridge, NJ) Jan 2026-present

- Engineered Next.js/Node.js features for internal API Marketplace of 166 APIs for engineers and partners
- Architected backend services managing API specs and artifacts across 4 cloud and gateway environments
- Automated CI/CD pipelines validating OpenAPI specs, cutting review cycles from ~2hrs to <5min

Full-Stack Software Development Intern: Verizon (Boston, MA & Basking Ridge, NJ) 2024-2025

- Built on-device ML pipeline for real-time video detection at <50ms latency, keeping customer data local
- Shipped Android client and cloud control plane with ~15 REST endpoints for home surveillance alerting
- Migrated auth service to MongoDB Atlas, cutting lookup latency ~40% and infrastructure cost ~25%

Software Engineer: SphereUs (Philadelphia, PA) Jan-May 2025

- Migrated production backend from PostgreSQL to MongoDB while scaling from 0 to 8 brand partners
- Integrated OpenAI APIs to generate personalized ambassador outreach, cutting content time ~50%
- Developed core modules of ambassador management platform from prototype to production

Application Developer Intern: CSL Behring (King of Prussia, PA) Apr-Jun 2024

- Redesigned internal tooling used by lab and manufacturing teams to streamline equipment data workflows
- Built parsing pipeline with AWS Textract + Apache POI extracting data from thousands of regulatory PDFs
- Prototyped RAG pipeline over pharmaceutical datasets, cutting analyst documentation time ~35%

Projects

[Sign Language Translator](#) Feb-Apr 2025

- Trained single CNN across ASL/DGS/LSE for real-time sign language translation from live video
- Tuned preprocessing and NLP pipeline to fix misclassifications and improve live transcription accuracy

[Meeting Scheduler](#) Mar-Apr 2024

- Built a full-stack app for managing teams and meeting bookings using MySQL, Node.js, and Express.js
- Managed complex database interactions with async calls, multi-table joins, and dynamic user roles

[Patient Daily Health Survey](#) Nov-Dec 2023

- Created web application which allows physicians to create and assign daily health surveys to patients
- Built MongoDB-backed full-stack app as proof of concept for biotech firm Aidar Health

[Snail Game](#) ([Play Here](#)) Oct-Nov 2023

- Programmed 3D horror/puzzle game in Unity with C# as entry for 2023 Jam-O-Lantern Game Jam
- Integrated collision systems, NPC movements, interactive puzzles, and intuitive UI menu screens

Technical Skills

Languages: Java | JavaScript | TypeScript | HTML | CSS | SQL | C# | C | C++ | Python

Software: Docker | Github | Visual Studio Code | IntelliJ | MySQL | PyCharm | Unity | GameMaker

Technologies: Git | Node.js | Express | React | JSON | MongoDB | JUnit | Windows | MacOS | Kali Linux

Education

Northeastern University, Boston, MA Sept 2022-Dec 2025

Khoury College of Computer Science

Bachelor of Science in Computer Science

GPA 3.83/4.00 | Dean's List (All Semesters)

Relevant Coursework: Foundations of AI | Database Management Systems | Computer Systems | Algorithms and Data | Object-Oriented Design | Programming in C++ | User Experience Design | Programming Languages

Teaching Assistant: Fundamentals of Computer Science 2

Jan-Apr 2024

Study abroad: Northeastern University – London, Northeastern University – Seattle

Interests

- Reading | World Cinema | Geography | Indie Music/Classic Rock | Piano | Comedy Sketches
